New! Updating our preventive drug list for smarter, more sustainable coverage

Effective January 1, 2027, Excellus BCBS will update the preventive drug list to better align coverage on high value, clinically appropriate preventive medications. As part of this update, select non preferred drugs, multi source brands and high cost generics will no longer be included on the preventive drug list. These changes are designed to support more sustainable pharmacy costs while maintaining access to effective preventive care. This change applies to all groups regardless of renewal date.
